Portfolio: biruk-girma.github.io/biruk-portfolio

PROFILE

Computer Science graduate (GPA 3.59/4.0) with hands-on experience in IT support, network troubleshooting and hardware maintenance. I also build and deploy full-stack web applications. I work well in teams, write clean maintainable code, and keep learning new technologies.

EXPERIENCE

IT Intern, Horn International College *July – August 2025*

- Fixed network issues and provided day-to-day technical support.
- Replaced computer RAM and SSDs, and carried out computer maintenance.
- Installed software and troubleshot hardware and software problems.
- Worked under the college administrator's supervision.

PROJECTS

NetPulse: network and device monitoring platform (Python, FastAPI, React, TypeScript, Docker)

- Built an async monitoring engine with retries, failure/recovery thresholds, a device state machine and deduplicated alerting, exposed through a REST API (FastAPI, SQLAlchemy).
- React and TypeScript dashboard with latency charts, uptime, outage history, device groups and on-demand checks. Separates device failures from monitoring failures and reports monitoring gaps as unmonitored time; 200+ automated tests.

Code: github.com/biruk-girma/netpulse

Tutor Marketplace (full-stack web app, live)

- A platform connecting students with tutors: authentication, tutor profiles and search, booking, ratings/reviews, and messaging.
- Backend deployed on Railway with a Postgres database; frontend deployed on Vercel. Includes curated learning resources per subject.

Live: tutor-marketplace-frontend.vercel.app | Code: github.com/biruk-girma/tutor-marketplace-backend

AlgoStudio (algorithm visualizer, live)

- Built with React 18, TypeScript (strict), Vite and Vitest.
- GitHub Actions CI pipeline runs type-check, tests and build on every push; deployed on GitHub Pages.

Live: biruk-girma.github.io/algostudio | Code: github.com/biruk-girma/algostudio

Online Bus Reservation System (final year project, team of 4)

- Shows all buses and lets users book tickets online with specific seat selection.
- Built with HTML, CSS, JavaScript and PHP. I took part in every part of the project.

EDUCATION

BSc in Computer Science, Mekdela Amba University *Graduated March 2026*

- GPA 3.59/4.0; degree taught in English.
- National Exit Exam: 73% (February 2026).

SKILLS

Web: HTML, CSS, JavaScript, TypeScript, React, PHP, Python, FastAPI, SQLAlchemy, REST APIs, responsive design
Databases: MySQL/SQL, PostgreSQL
Tools and deployment: Git/GitHub, GitHub Actions, Docker, Railway, Vercel, GitHub Pages
IT support: Network troubleshooting, hardware repair/upgrades, software installation, computer maintenance
Languages: Amharic (native), English (fluent)

STRENGTHS

Teamwork, responsibility, clean code, continuous learning
